

Factors Affecting Contribution

Objective

To determine factors that may affect student contribution in a production.

Process

Students will brainstorm a list of factors affecting their ability to contribute in a work situation. They will then verify these through experience and reflection in a group setting.

The list may be based on previous work experience, volunteer work, teamwork activities, and extra-curricular participation within the school.

See chart handout included on the next page. Once the chart is filled out and responses have been compared and discussed in a group situation, the activity is finished.

Assessment

Teachers might have the students hand in the completed forms.

Teachers might utilize the Theatre Log and ask for a reflection, writing on this experience whereby the student sets goals based upon the factors affecting their contribution.
